Assigned DOGM File No.: S 10231058

DOGM Lead: 7 m

STATE OF UTAH
DEPARTMENT OF NATURAL RESOURCES
DIVISION OF OIL, GAS AND MINING

1594 West North Temple Suite 1210 Box 145801 Salt Lake City, Utah 84114-5801 (801) 538-5291

Fax: (801) 359-3940

## NOTICE OF INTENTION TO COMMENCE SMALL MINING OPERATIONS

The informational requirements of this form are based on provisions of the Mined Land Reclamation Act, Title 40-8, Utah Code Annotated 1987, and the General Rules as promulgated under the Utah Minerals Regulatory Program.

"Small Mining Operations" means mining operations which disturb five or less surface acres at any given time.

I. GENERAL INFORMATION (Rule R647-3-104)

1. Name of Mine:	ar daise
2. Name of Operator/A Company ( ) Corp	pplicant: Bonnie Birch Jenses poration () Partnership () Individual (7
3. Permanent Address:_ City:	Lake Coky State: USAL Zip Code: 84105
	Domain (BLM) ☐ National Forest (USFS) ☐ ions ☐ State Sovereign Lands ☐

areas to be disturbed should be plotted in sufficient detail so that they can be located on the ground. It is recommended that the operator also plot and label any pre-existing

disturbances in the immediate vicinity that he is not responsible for.

## III. OPERATION PLAN (Rule R647-3-106) 1. Type of mining: Surface

Type of mining: Surface II Underground $\square$	
Mineral(s) to be mined: Peak Moss Real Ha	umus
Provide a brief description of the proposed mining operation and onsite profacilities.	ocessing KISHI
□ New Road(s): Length (ft) Width	(ft
☐ Improved Road(s): Length (ft) Width	(ft
Total project surface acreage to be disturbed:	(acres)
Proposed startup date of project (month, year)	
Proposed completion date of project if known (month year)	

## IV. OPERATION AND RECLAMATION PRACTICES (Rule R647-3-107, 108 & 109)

The reclamation and operation obligation is to keep the area clean and safe, minimize hazards to public safety, return the land to a useful condition, and reestablish at least 70 percent of the premining vegetative ground cover. To accomplish this, the operator will need to perform reclamation concurrently, or at the completion (within one (1) year) of mining:

- 1. Keep the mining operation in a safe, clean, and environmentally stable condition.
- 2. Permanently seal all shafts and tunnels to prevent unauthorized or accidental entry.
- 2. Plug drill holes with a five foot cement surface plug. Holes that encounter fluids are to be plugged in the subsurface to prevent aquifer contamination.
- 4. Construct berms, fences, or barriers, when needed, above highwalls and excavations.
- 5. Remove, isolate, or neutralize all toxic materials in a manner compatible with federal and state regulations.
- 6. Remove all waste or debris from stream channels.
  - 7. Dispose of any trash, scrap metal, wood, machinery, and buildings.
  - 8. Conduct mining activities so as to minimize erosion and control sediment.

_	9.	Reclaim all roads that are not part of a permanent transportation system.
_	10.	Stockpile topsoil and suitable overburden prior to mining.
_	11.	Stabilize highwalls by backfilling or rounding to 45 degrees or less, where feasible; reshape the land to near its original contour, and redistribute the topsoil and suitable overburden.
-	12.	Properly prepare seedbed to a depth of six inches by ripping, discing, or harrowing.
_	13.	Reseed disturbed areas with adaptable species. (The Division recommends seeding 20 lbs./acre of native and introduced species of grass, forb, and browse seed, and will provide a specific species list if requested.)
	14.	Plant the seed with a rangeland or farm drill, or if broadcast seeded, harrow or rake the seed 1/4-1/2 inch into the soil - fall is the preferred time to seed.
v.		VARIANCE REQUEST (Rule R647-3-110)
		Yes ⊠ No □
	Red	y planned deviations from Rules R647-3-107, Operation Practices, R647-3-108, Hole Plugging quirements, or R647-3-109, Reclamation Practices, as summarized above, should be identified ow and justification given for the variance request(s).
	Iter	m Number Variance Request Justification
